

Open Access E-Journal PEPS

The Japan Geoscience Union (JpGU) would like to introduce its peer reviewed English language open access e-journal Progress in Earth and Planetary Science (PEPS), which has been published by the JpGU and Springer since April 2014. PEPS prints original research articles and high quality review articles covering all of the fields of Earth and Planetary Science, including:

- Space and planetary sciences
- Atmospheric and hydrospheric sciences
- Human geosciences
- Solid earth sciences
- Biogeosciences.

It also welcomes papers based on interdisciplinary research.

As an open access journal PEPS charges an Article Processing Charge (APC), however the JpGU will partially or fully subsidize the APC for review articles, invited research articles and manuscripts submitted by JpGU members.

Full details about PEPS (including all published papers and information about submitting papers) are available on the Springer PEPS Website,

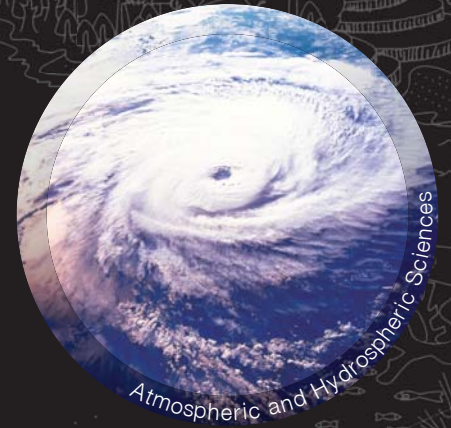

<http://progearthplanetsci.springeropen.com/>.

The JpGU PEPS Website,

<http://progearthplanetsci.org/index.html>, provides additional information including a gallery view of all published papers for easier browsing, and templates to use when submitting manuscripts.

We hope you will find the papers published by PEPS interesting and useful, and we would like to ask researchers from all over the world to consider PEPS when submitting their next paper for publication.

Progress in Earth and Planetary Science (PEPS)
